Professional Summary

Engineer with ~2 years combined experience across data/analytics engineering, control systems, and battery modeling. Builds reproducible pipelines (PySpark/Delta/dbt/Airflow), ML prototypes (scikit-learn/XGBoost/PyTorch), and physics-based Li-ion models (SPMe/DFN in PyBaMM). Comfortable across Python/SQL/JS/Java, CI/CD (GitHub Actions), containers (Docker), and dashboards (Power BI/Streamlit).
